

Manasvi Khanna

Boston (open to relocation) | 3392139739 | mk1@wellesley.edu | linkedin.com/in/manasvi-khanna | https://github.com/manasvi-khanna

Data Scientist

Data Scientist with 2 years of experience in renewable energy and tech industries. Expertise in regression modeling, data visualization, integration, and portfolio management. Proven track record of enhancing forecasting accuracy, and increased data-driven capabilities in assessing financial risk, engagement insights in media-focused companies.

EDUCATION

Wellesley College

Bachelor Of Arts In Data Science And Psychology | Wellesley, MA, USA | GPA: 3.75 | 12/2022

Massachusetts Institute Of Technology

Cross-Registered in Computer Science | Boston, MA, USA | GPA: 4

WORK EXPERIENCE

REsurety | Boston

Data Analyst

- Improved renewable energy forecasts through regression modeling, capturing 90% of underperformance and curtailment, leading to more accurate budgeting for purchasing clean energy.
- Audited global clean energy portfolios and settlements for seven clients, resolving discrepancies in issued invoices totaling over \$200,000.
- Identified trends in portfolio performance and provided insights on market-related or operational issues affecting wind project outcomes using on-site data, reducing risk exposure.
- Automated time series data ingestion for 200+ contracts across 2 platforms, collaborating with stakeholders to gather requirements. Designed ETLs, integrated APIs with Python, Snowflake, and Airflow.

Spotify | New York City | 06/2022 - 09/2022

Data Analyst

- Leveraged BigQuery and Python to analyze and integrate multiple data sources, creating metrics that improved user engagement insights for Spotify's Tech Learning team in 3 months.
- Automated data pipeline using BigQuery to create a dashboard on Tableau visualizing course attendee demographics; increased team efficiency and decreased time spent by 75%.

Tik Tok Bytedance | Los Angeles | 03/2021 - 08/2021

Data Analyst

- Analyzed survey data from 6000 employees using R and presented insights at TikTok's All Hands to drive inclusion and engagement initiatives. Tailored results by faction to inform targeted hiring strategies based on specific locations and roles.
- Recommended featuring employee spotlights to increase engagement by 18% during heritage months on social media post social media analysis CTR, Likes, Follows, engagement metrics.

PUBLICATIONS

Spatial Analysis of the Indian Farmers' Protest (in-review) | 03/2024

PLOS ONE

The research utilizes a log Gaussian Cox process model to analyze the Farmers' Protests' spatial distribution in India. Our models provide insight into the debated topic by analyzing the composition of the Farmers' Protests to inform policy decisions.

PROJECTS

Testing Localization on Google Search in India

Extracted and analyzed search results for 5 queries in 4 languages across 733 cities using Python (Selenium). Applied hierarchical clustering and correlation to uncover localization trends, showing stronger localization for regional languages and news compared to event-related queries.

Elective Matching for CS Majors

Designed a website using SQL and an optimal matching algorithm to assign CS electives, accounting for seniority, class size, and student preferences. Enabled efficient course registration for students and accessible tools for professors.

SKILLS

Programming, Data Manipulation, Visualization & Modeling: Python, SQL, R, Regression Analysis, NumPy, Pandas, Tidyverse, Scikit, Dplyr, Matplotlib, Ggplot2, Seaborn, Plotly Software, Snowflake DBs

Cloud & Tools: Amazon Web Services, Google Cloud Platform, Git, Boto3, Airflow, AWS S3, GCP BigQuery, Tableau, Microsoft Power BI
